**Before you invest in any fund, consider how the fund would work with your other investments and your tolerance for risks.**

**This mutual fund is an alternative mutual fund. It is permitted to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. The specific strategies that differentiate this fund from other types of mutual funds include: increased ability to use derivatives for hedging and non-hedging purposes; increased ability to sell securities short and the ability to borrow cash to use for investment purposes. While these strategies will be used in accordance with the fund's investment objectives and strategies, during certain market conditions they may accelerate the pace at which your investment decreases in value.**

**Quick facts**

<b>Fund code:</b> LDM300	<b>Fund manager:</b> Nymbus Capital Inc.
<b>Date class started:</b> May 12, 2026*	<b>Portfolio manager:</b> Nymbus Capital Inc.
<b>Total value on March 31, 2026:</b> \$47,108,456	<b>Distributions:</b> Net income and net realized capital gains for the year, December (automatically reinvested in additional units, unless the investor chooses differently).
<b>Management expense ratio (MER):</b> 2.90%	<b>Minimum investment:</b> \$500 (initial), \$500 (subsequent)

\* From April 28, 2023, until the date the class started, Class A units of the fund were distributed pursuant to an exemption from the prospectus requirement. No Class A units were outstanding prior to August 15, 2024.

**What does the fund invest in?**

The fund seeks to maximize total return and capital appreciation within a moderate risk framework while maintaining a low targeted correlation to traditional markets and prioritizing prudent investment management. The Fund primarily invests, directly and indirectly, in debt instruments, derivative instruments, global equity securities and other investment funds. Cash and cash equivalents may be held for investment purposes, liquidity management, and to support derivative positions. The fund may borrow cash for investment purposes and may engage in short selling and specified derivative transactions, in accordance with applicable securities legislation. The fund's leverage must not exceed three times (300%) the fund's net asset value, calculated in accordance with the methodology prescribed under National Instrument 81-102 or any applicable exemptive relief. The fund may invest up to 100% of its net assets in foreign securities and up to 30% in emerging market securities.

The tables below provide you with a snapshot of the fund's investments March 31, 2026. The fund's investments will change.

### How risky is it?

The value of the fund can go down as well as up. You could lose money. One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility". In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

### Risk Rating

Nymbus Capital Inc. has rated the volatility of this fund as **Medium**.

This rating is based on how much the Fund's returns have changed year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low-risk rating can still lose money.

Low	Low to Medium	<b>Medium</b>	Medium to High	High
-----	---------------	---------------	----------------	------

For more information about the risk rating and specific risks that can affect the fund's returns, see the "What is a mutual fund and what are the risks of investing in a mutual fund?" section of the fund's simplified prospectus.

### No guarantees

Like most mutual funds, this fund does not have any guarantees. You may not get back the amount of money you invest.

### How has the fund performed?

This section tells you how Class A units of the fund have performed over the past two years. Returns are after expenses have been deducted. These expenses reduce the fund's returns.

#### Year-by-year returns

This chart shows how Class A units of the fund performed for the past year\*. The fund did not drop in value during that year. The range of returns the return can help you assess how risky the fund has been in the past. It does not tell you how the fund will perform in the future.

\* From April 28, 2023, until the date the class started, Class A units of the fund were distributed pursuant to an exemption from the prospectus requirement. The expenses of the Class A units of the fund would have been higher during such period had the Class A units been subject to the additional regulatory requirements applicable to a reporting issuer. No Class A units were outstanding prior to August 15, 2024.

### Best and worst three-month returns

This table shows the best and worst 3-month returns for Class A units in the last two full calendar years\*. These returns could go up or down. Consider the loss you would be able to bear over a short period of time.

	Return	3 months ended	If you invested \$1,000 at the beginning of this period
<b>Best return</b>	13.17%	August 29, 2025	Your investment would increase to \$1,131.69
<b>Worst return</b>	-10.20%	May 30, 2025	Your investment would decrease to \$897.99

\* From April 28, 2023, until the date the class started, Class A units of the fund were distributed pursuant to an exemption from the prospectus requirement. The expenses of the Class A units of the fund would have been higher during such period had the Class A units been subject to the additional regulatory requirements applicable to a reporting issuer.

### Average return

As of March 31, 2026, the value of a \$1,000 investment in Class A of the fund since its inception is now worth \$1,202.11. This works out to an annual compounded return of 11.68%\*.

\* From April 28, 2023, until the date the class started, Class A units of the fund were distributed pursuant to an exemption from the prospectus requirement. The expenses of the Class A units of the fund would have been higher during such period had the Class A units been subject to the additional regulatory requirements applicable to a reporting issuer.

### Who is this fund for?

This fund is for investors who:

- plan to hold their investments for the medium to long term;
- are seeking an investment with low correlation to traditional stocks and bonds within a portfolio;
- are seeking exposure to hedged equities, hedged income, and alternative strategies to target return generation and manage risk; and
- can tolerate a medium level of risk.

### A word about tax

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan, or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

## How much does it cost?

The following tables show the fees and expenses you could pay to buy, own and sell Class A units of the fund. The fees and expenses, including commissions, can vary among classes of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

### 1. Sales charges

Neither the Fund nor Nymbus Capital Inc. charge you any sales charges when you buy, redeem or switch units of the fund. For Class A units, your dealer may charge you additional fees, not exceeding 0.5% of the subscription price. Nymbus Capital Inc. does not receive any of these initial sales charges – they go directly to your representative. Sales charges are negotiated directly with your representative.

### 2. Fund expenses

You don't pay these expenses directly. They affect you because they reduce the fund's returns.

As of December 31, 2025, the fund's expenses were 3.17% of its value. This equals \$31.70 for every \$1,000 invested\*.

	Annual rate (as a % of the fund's value)
<b>Management expense ratio (MER)</b> This is the total of the Fund's management fees (which includes the trailing commission), fixed administration fees** and operating expenses not covered by the fixed administration fees.	2.90%
<b>Trading expense ratio (TER)</b> This is the fund's transaction costs.	0.27%
<b>Fund expenses</b>	3.17%

\* From April 28, 2023, until the date the class started, Class A units of the fund were distributed pursuant to an exemption from the prospectus requirement. The fund was not previously a reporting issuer, and the MER did not take into account various fund expenses that will now be incurred as a mutual fund whose shares are distributed by prospectus. If the fund had been a mutual fund distributed by prospectus, the fees would have been higher. These fees are charged directly to you. See "Other Fees" below. To pay these fees, the fund manager redeems a sufficient number of units from each investor to cover the amount of fees owed to the fund manager.

\*\* A-Class units pay a fixed administration fee which is 0.50%.

### More about the trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the fund. It is for the services and advice that your representative and their firm provide to you. Nymbus Capital Inc. pays the trailing commission to your representative's firm. It is paid from the fund's management fee and is based on the value of your investment. The rate for the class A units of the fund is 0.5% of the value of your investment each year. This equals to \$5 each year for every \$1,000 invested.

### Performance fees

Nymbus Capital Inc. is entitled to receive a performance fee equal to 15% of the fund's return, after deducting management fees and provided that a minimum rate of 5% (hurdle rate) is achieved for a calendar year. In addition, the permanent threshold (high-water mark) ensures that all previous losses must be fully recovered before any future performance fees can be applied.

### 3. Other fees

You may have to pay other fees when you buy, hold, sell or switch units of the fund.

Fees	What you pay
<b>Short-term Trading fees</b>	2% of the value of the units you redeem or switch within 90 days of purchase may be charged. These fees are not paid to the Manager but to the affected Fund.
<b>Transfer fee</b>	Your dealer may charge fees if you transfer to another financial institution or if your dealer provides optional services. These fees are not paid to the Manager.

## What if I change my mind?

Under securities law in some provinces and territories, you have the right to:

- withdraw from an agreement to buy mutual funds within two business days after you receive a simplified prospectus or a fund facts document, or
- cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the simplified prospectus, fund fact document or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

## For more information

Contact Nymbus Capital Inc. or your representative for a copy of the fund's simplified prospectus and other disclosure documents. These documents and the fund facts make up the fund's legal documents.
